## Scheduling, Registration & Records Management

✓ Included

○ Optional

Features	interVIEW	interWORKS	interPRISE	interORTHO
Scheduling and front desk registration via color-coded DayPlanner provides at-a-glance status of each modality or scheduling resource.	✓	✓	✓	○
Centralized scheduling capability for multi-site healthcare enterprises.			✓	
Next available appointment search optimizes scheduling and provides patients with timely appointments.		✓	✓	
Sophisticated scheduling rules manage repeating appointments, scheduling conflicts, and scheduling resources.		✓ Five Rules Per Resource	✓ Unlimited Rules Per Resource	
Nuclear medicine sequencing and scheduling capabilities help schedulers manage injections and subsequent procedures with ease.			✓	
Advanced RIS capabilities including patient and visit management, face sheets, procedure preps, and patient screening and education forms, streamline workflow by providing all materials in one complete system.		✓	✓	
Patient and order-level document scanning provide healthcare professionals access to all relevant information and patient history regardless of their location.	✓	✓	✓	✓
Insurance verification and precertification management ensures proper reimbursement for procedures.		✓	✓	
Diagnosis coding, custom CPT codes, billing reconciliation, and exploding procedures at scheduling, billing, and completion ensure proper payment and reimbursement for imaging services.		✓	✓	
Intuitive MasterFolder emulates a traditional radiology jacket—technologists, radiologists, and other healthcare personal learn to use the system quickly with minimal training.	✓	✓	✓	✓
Bar code and jacket label printing manage any remaining non-digital materials, such as film and paper.	✓	✓	✓	✓
Medical records management such as pull lists as well as CD, film, and report distribution worklists.	✓	✓	✓	✓
Interface to other healthcare systems to receive patient information and orders via HL7.	○	○	○	○

## Technologist Quality Assurance (TechQA)

✓ Included

○ Optional

Features	interVIEW	interWORKS	interPRISE	interORTHO
Quality assurance review for image quality, sequencing, and positioning. Technologists can correct any errors before submitting studies to interpreting physicians.	✓	✓	✓	✓
Order-level document scanning provides forms and reference materials to the interpreting physician.	✓	✓	✓	✓
Opportunity to change or record additional procedures and ancillary charges required for the patient. Many healthcare facilities lose revenue by failing to record additional procedures and ancillary equipment.	✓	✓	✓	✓
Status notifications alert technologists when patients complete front desk registration.	✓	✓	✓	✓
Group Login capabilities make it easy for technologists to share a computer while completing studies.	✓	✓	✓	✓

## Image Review and Management

Features	interVIEW	interWORKS	interPRISE	interORTHO
DICOM modality worklists with information received from Avreo Scheduling or optional HL7 interfaces.	✓	✓	✓	✓
Web-based worklists provide access to studies based on the needs of each healthcare professional's activities.	✓	✓	✓	✓
Robust Diagnostic viewer offers extensive image review and comparison tools for relevant priors, including priors provided on CD using DICOMDIR.	✓	✓	✓	✓
FDA approved Mammography viewer displays DICOM compliant mammography images and prior comparisons properly regardless of the originating PACS system. In addition, compare breast imaging from other modalities, such as ultrasound, CT, MRI & PET. (Viewer requires FDA approved 5MP monitors.)	✓	✓	✓	
Interface to Mammography Tracking systems.		○	○	
Orthopedic Templating module extends your surgical planning capabilities by incorporating OrthoView digital planning software into your workflow.	○	○	○	○
MIP/MPR tools for enhanced image visualization.	✓	✓	✓	
3D Volume and PET Fusion module for enhanced image visualization.	○	○	○

## Report Production & Distribution

✓ Included

○ Optional

Features	interVIEW	interWORKS	interPRISE	interORTHO
Digital dictation offers traditional report production workflow in one software application.	✓	✓	✓	○
Template dictation reduces report-turnaround time through the use of Voice Recognition dictation and configurable report templates. (Requires Dragon NaturallySpeaking Voice Engine)	✓	✓	✓	○
Template-based transcription from any location with web-based transcription system and medical spell checker.	✓	✓	✓	○
Worklist-managed electronic report signature capabilities support a true paperless reporting workflow.	✓	✓	✓	○
Automated report distribution to referring physicians via fax, email & network printers based on each referring physician's preferences.	✓	✓	✓	○

## Referring Physicians

Features	interVIEW	interWORKS	interPRISE	interORTHO
Referring physicians automatically receive reports via fax, email, or network printer based on their preferences.	✓	✓	✓	○
Authorized referring physicians can access reports and JPG or DICOM images from any location via the web.	✓	✓	✓	○
Authorized referring physicians can access preliminary dictations before the interpreting physician electronically signs the report.	✓	✓	✓	○
Referring physician groups and consult rules provide appropriate patient information to affiliated physicians.	✓	✓	✓	○

## Administration & Management

✓ Included

○ Optional

Features	interVIEW	interWORKS	interPRISE	interORTHO
Extensive management and system reports provide real-time feedback of enterprise activity.	✓	✓	✓	✓
Complete audit management coverage tracks every interaction in your radiology workflow.	✓	✓	✓	✓
Security portals controls the activity each user can perform within the application.	✓	✓	✓	✓

## Storage and Interfaces

Features	interVIEW	interWORKS	interPRISE	interORTHO
Primary and secondary data storage.	○	○	○	○
Interface with DICOM complaint systems for image exchange.	○	○	○	○
Interface with HL7 compliant systems for ADT, ORM, and ORU message data exchange.	○	○	○	○
Simple URL integration to your healthcare facility's Enterprise Health Record.	○	○	○	○
