

Revolve around your patient.

Proprietary software eliminates the need to toggle between screens, streamlining workflow.

Perform efficient Digital Radiography exams from almost anywhere in an exam room with the versatile OTC System. Highly automated and driven by customizable software, the system features a ceiling-mounted X-ray tube that moves about the room to treat patients while lying down, sitting or standing, including those in a wheelchair or gurney. Your staff will find the ease of use and the imaging flexibility they need to make fast, accurate diagnoses.

- Superior image quality
- Simple workflows
- Automated efficiency

Comfort for patients. Convenience for clinicians.

Superior image quality

The acclaimed Ultra software controls the system and processes images with outstanding speed and quality. The OTC system maintains proper alignment between tube and detector without losing positioning flexibility.

Simple workflows

Whereas most imaging workflows force clinicians to toggle between multiple screens, the OTC system features a proprietary software interface that confines all vital images and data to a single screen, enhancing clinician productivity and freeing up more time to spend with patients. The software is also customizable to support your specific image capture needs.

Automated efficiency

The OTC system applies a combination of advanced auto-positioning and auto-tracking capabilities to speed and simplify each patient exam. The software allows the hardware to be positioned in place before a patient enters the room, helping you make the most of every visit. Your system can be specified in manual, semi-automated or fully automated configurations, with one or multiple X-ray detectors to meet your needs. Semi-automated options are available.

1. Automated positioning and tracking to cover almost the entire volume of any exam room
2. Elevating table for a variety of configurations and fully automated vertical movement
3. Upright wall stand provides a wide range of tilt angles and large vertical travel distance

Key Features				Detector
Standard		Options		AeroDR®
Fully Automated	Four-way Floating Table	Multiple Tube/Generator Combinations	Stitching Stand	17" x 17" and 14" x 17" Detector Combinations
Auto Positioning/Auto Tracking	Tilting Wall Stand	DAP Meter	Weight-bearing Stand	Multiple Configurations Available
Tube Mounted Control	Ceiling Suspended Tube	AEC	Custom views	
Generator Control	Advanced Processing Algorithms	Pediatric Imaging Package	Rotating Bucky for 14" x 17" Detectors	
Angle Read-out	Motorized Angulation	Auto-stitching		

Comprehensive Coverage for Peace of Mind

To minimize downtime, maximize productivity and mitigate risk over a long functional life, the **Konica Minolta Blue Moon Select** plan for the Overhead Tube Crane (OTC) goes beyond typical warranty coverage by including DR panel protection, software updates, onsite service, remote applications, and 24/7 technical assistance. One simple plan. No worries. Sign up at the system point of sale for the lowest five-year cost of ownership.
